

# Pail Labelling a Headache? Not with our E 33 Labelling Machine!

**E 33**  
Labelling machine

As an *economic alternative* for the labelling of large containers the LANGGUTH production programme has been expanded to include the E 33 labelling machine.

The machine will apply labels to cylindrical, oval, tapered and square containers in sizes from 1 to 6 gallons.

The container is travelling on a conveyor chain in a linear mode and accurately spaced by the infeed stopper. The label is released via photo eye and placed centered onto the container, thus avoiding a horizontal misalignment due to the tapered form of the pail. The final label application is carried out in the press-on station with clamping jaws covering the complete label, to assure a smooth finish without wrinkles.

**Convincing advantages:**

- Ø Reasonable price
- Ø Compact design
- Ø Consistent label placement
- Ø Proven technique
- Ø Easy handling

**Do you need a higher capacity or do you want to apply front- and back label simultaneously?**

**We can offer this solution as well!**

**Ask for our brochures and advise. We will be pleased to let our more than 65 years of labelling experience work for you.**

***Technical Data***

<b>Capacity</b>	max. 17 ppm (depending on pail and label size)
<b>Container diameter</b>	5 1/8" - 13"
<b>Label height</b>	1 3/8" - 8 1/4" (option: 315 mm)
<b>Label length</b>	8" - 15 1/2"
<b>Label magazine</b>	Oscillating magazine
<b>Glueing</b>	Wet glue, strip glueing on total label length
<b>Glue pump</b>	pneumatic, Type DLP 63
<b>Electrical specifications in compliance with EN 60204</b>	230 or 400 Volt, 3 phase, 50 or 60 Hz, control voltage 24 V protection IP 54 (special voltage available)
<b>Connected load</b>	ca. 1,0 kW
